**Notification Description (Including Extent, Purpose / Reason, and Effect on Form, Fit and Function)**

As part of our ongoing continuous improvement efforts, US Digital is implementing a change to the packaging of our 2 in. Hubdisk assemblies.

We are replacing the current plastic tube packaging with a 10-count plastic tray. The tray is a two-piece design with snap-on lid and anti-static coated for ESD sensitive environments. This change is designed to enhance the ease of handling for our customers, provide easy removal of the individual hubdisks, and protect against potential damage due to long-term storage of hubdisk assemblies.

This change does not affect form, fit or function of the final product.
